question4
-- select a question --

Finish

The cardholder will need to select and answer four security questions

Important! Security Account provides security and ensures that only the account holder can access their credit card account online.

- The cardholder will create a Security Account which will only be shared between them and your institution
- When they see their Security Account, they can be confident that they are at the legitimate eZCard website, not an imposters site

In addition, Security Account remembers which computer(s) are normally used, preventing others from logging into the account

If another computer is used to log in, the cardholder will be required to register it

Note: Please advise the cardholder to choose to have eZCard remember their personal computer

- This will enable them to log in from their personal computers without going through the Security Account steps each time
